## Scientifically developed, designed for safety

Developed by a university research team and Infection Prevention Healthcare professionals, UV-HEROES® ensures effective, reliable, eco-friendly hygiene backed by scientific evidence.

## Hygiene and safety always within reach

UV-HEROES® automatically activates UV-C LEDs and takes care of hygiene while you focus on your patients.

Insert the stethoscope head into the device.

The hygiene cycle starts and completes automatically.

Your stethoscope is clean and ready for the next patient.

Powered by high-capacity button-cell batteries, affordable, easy to find, and easy to replace, UV-HEROES® offers over 200 cycles per charge. Its advanced UV-C LED technology is designed to last, guaranteeing over 100,000 cycles.

## Invisible technology, tangible benefits

### Features

Latest generation UV-C LED

Compact, intuitive design

Robust device and technology

### Benefits for Professionals

Rapid and automatic hygiene

Easy to use, compatible with most stethoscopes

Long-term durability and capability over 100,000 cycles

### Value for Patients

Increased protection against infections

Limits cross-contamination risks

Consistent hygiene for peace of mind during examinations
